January 31, 2006

Governor Arnold Schwarzenegger
State Capitol Building
Sacramento, CA 95814

Dear Gov. Schwarzenegger,

Cenveo Anderson Lithograph is encouraged that you took the historic step of announcing ambitious greenhouse gas emission reduction targets for the state of California in your Executive Order of June 2005. Our company believes that moving forward to reduce greenhouse gas emissions is good for California, and the world.

Our company has direct experience in the benefit resulting from investments in clean, efficient energy and innovative technologies. *Cenveo Anderson Lithograph* generates all of its own electricity through a natural gas fueled cogeneration facility and is a zero-waste facility; no waste, even non-hazardous, generated by any aspect of *Cenveo Anderson Lithograph* operations goes to landfill. These operational changes have not only improved the company's performance from a sustainability perspective they have also benefitted our bottom line. In 2003, *Cenveo Anderson Lithograph* was recognized for its efforts in developing sustainable printing operations as we were the recipient of both the Governor's "Environmental and Economic Leadership Award" and the South Coast AQMD's "Clean Air Award" for the innovative use of non-pollution control technology to capture and destroy previously uncontrolled, or fugitive, volatile organic compound emissions from printing operations. *Cenveo Anderson Lithograph* has been an active member of the California Climate Action Registry for the past three years and was the first printer to join the Registry and post its "GHG" emissions as a matter of public record.

We think that the key recommendations developed by the Climate Action Team: mandatory emissions reporting, a coordinated investment strategy for the state's large institutional investors, provisions for early action credit, and a public goods charge on transportation to generate investment for improvements in the transportation sector, the single largest source of global warming pollution in California, are reasonable and measured. We encourage you to move forward to see them enacted into law.

Anderson Lithograph supports your efforts, Governor Schwarzenegger, to keep California a leader in the effort to halt global warming and avert dangerous climate change.

Sincerely,

Mark F. Tennant
President and General Manager
Cenveo Anderson Lithograph
